- Led photography and planning efforts for large-scale events and creative visual campaigns

Projects and certificates

- **Global Layoffs Analysis** [GitHub](#)

(Tools: Power BI, MySQL)

Built an analytics workflow by cleaning and querying layoff data in SQL, then visualizing insights in Power BI. Focused on industry-wise, regional, and time-based trends using custom measures.

- **Data Professionals Survey Report** [GitHub](#)

(Tools: Power BI)

Developed a Power BI dashboard to visualize survey results from data professionals. Used DAX for salary trend analysis and built interactive visual elements with slicers and filters.

- **Bike Purchase Analysis** [GitHub](#)

(Tools: Microsoft Excel)

Designed an interactive dashboard using PivotTables and charts to analyze customer demographics and purchase behaviour. Applied formulas and conditional formatting for automated insights.

Skills

- **SQL:** for data cleaning and querying
- **Power BI:** for dashboarding and insight visualization
- **Excel:** for analysis, modelling, and reporting
- **Case Cracking:** structured problem solving and guesstimates
- **Communication:** proficient in English with strong verbal and written skills for team coordination and professional interaction
